SUMMARY

Computer and Information Science student skilled in software development, AI, and full-stack web/mobile applications. Experienced in building real-world systems and eager to apply technical skills to challenging projects.

WORK EXPERIENCE

People Detection System   **Internship – NT Khon Kaen, 2025**
- Developed real-time object detection system using YOLOv5, Python, and Tailwind CSS for people identification via RTSP streaming.
- Designed intuitive UI and optimized model performance for live CCTV monitoring.

Shopping Cart System   **2024**
- Built responsive shopping cart using Next.js with real-time updates and optimized state management.
- Ensured seamless UX across multiple devices.

Weather Forecast Web Application   **2024**
- Developed a responsive weather forecast app using React and OpenWeather API to display real-time weather data.
- Implemented search functionality and geolocation features, enhancing user experience on both mobile and desktop devices.

Student Activity Registration System   **2024**
- Designed and built a web-based platform using PHP, MySQL, and Bootstrap for managing student event registrations.
- Added admin dashboard for event management and participant tracking, improving registration efficiency by 40%.

E-commerce Platform & Admin Dashboard   **2023**
- Created PHP/MySQL-based platform for IT product sales with secure payment, inventory management, and order tracking.
- Developed admin dashboard for streamlined business operations.

Restaurant Seat Reservation System   **2023**
- Designed C# system to improve seating management, reduce overbooking, and enhance customer experience.
- Integrated access control for both customers and administrators.

EDUCATION

Bachelor of Computer and Information Science   **Expected May 2026**
Faculty of Interdisciplinary Studies, Khon Kaen University
- GPAX: 3.21
- Relevant Coursework: Software Development, Artificial Intelligence, Web & Mobile Application Development.

ADDITIONAL INFORMATION

- **Technical Skills:** JavaScript, Python, C++, C#, PHP, HTML, Tailwind CSS, React, Next.js, MySQL, MongoDB, Firebase
- **Languages:** Thai (Native), English (Intermediate)
