SUMMARY

Computer and Information Science student at KKU with hands-on experience from 2 internships - an AI-powered learning platform at Woxa Corporation and a real-time computer vision system at NT Khon Kaen. Skilled in backend development with NestJS, PostgreSQL, Docker, and AWS, as well as frontend development with Next.js and React.

WORK EXPERIENCE

- Intelligent Online Learning Platform with Gamification**
 - Developed a microservices-based RESTful API backend using NestJS, PostgreSQL, Redis, Docker, and AWS for a gamified online learning platform
 - Integrated Ai LLaMA 3 for automatic quiz generation and implemented WebSocket for real-time user activity tracking
 - Configured Google OAuth 2.0 for secure authentication and managed cloud deployment on AWS
- Internship - Woxa Corporation Ltd 2025**
- People Detection System**
 - Built a real-time people detection system using Python, YOLOv5, OpenCV, and RTSP streaming, achieving sub-100ms inference latency
 - Optimized model performance and pipeline processing for low-latency CCTV analytics
 - Designed and developed a responsive dashboard for real-time monitoring of detection results
- Internship - NT Khon Kaen 2025**

PROJECTS

- Shopping Cart System**
 - Built a responsive e-commerce cart system using Next.js with real-time state synchronization and optimized rendering
 - Improved user experience across mobile and desktop through efficient state management and UI optimization
- 2024**
- Student Activity Registration System**
 - Developed a web-based event registration platform using PHP, MySQL, and Bootstrap
 - Designed an admin dashboard for event management and participant tracking, improving registration efficiency by 40%
- 2024**
- E-commerce Platform & Admin Dashboard**
 - Built a full-stack e-commerce platform using PHP and MySQL with features including secure payment, inventory management, and order tracking
 - Developed an admin dashboard to streamline operations and improve order management.
- 2023**
- Restaurant Seat Reservation System**
 - Designed and implemented a reservation system using C# to optimize seating allocation and reduce overbooking
 - Implemented role-based access control for customers and administrators
- 2023**

EDUCATION

- Bachelor of Computer and Information Science**
Faculty of Interdisciplinary Studies, Khon Kaen University
- Expected May 2026**
- GPAX: 3.26
 - Relevant Coursework: Software Development, Artificial Intelligence, Web & Mobile Application Development.

ADDITIONAL INFORMATION

- Technical Skills:** JavaScript, TypeScript, Python, PHP, React.js, Next.js, NestJS, REST APIs, WebSocket, PostgreSQL, MongoDB, Redis, AWS, Docker
- Languages:** Thai (Native), English (Intermediate)
