

NUNTHAWAT SAEHUAM

FULLSTACK DEVELOPER

CONTACT

- 062-520-6392
- morgorn.wk@gmail.com
- Muang District, Muang Khon Kaen, 40110, Thailand

TECHNICAL SKILL

Frontend

Next.js, React.js, TypeScript, JavaScript
Tailwind CSS, HTML5, CSS3

Backend

Node.js, NestJS, FastAPI, Go

Database

PostgreSQL, MongoDB, Redis (caching)

DevOps & Cloud

Docker, CI/CD (GitHub Action), Apisix
Nginx, Portainer, AWS, Cloudflare

Tool

Git, GitHub, Postman, VS Code, Figma

EDUCATION

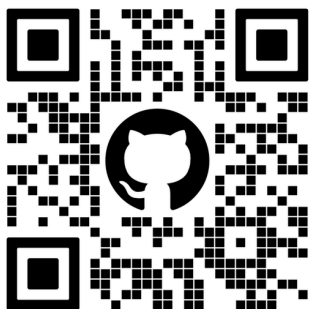

Bachelor of Computer and Information Science

Faculty of Interdisciplinary Studies
Khon Kaen University

- GPAX : 3.26

LANGUAGES

Thai (Native)
English (Intermediate)

SUMMARY

Recent Computer Science graduate with hands-on experience in full-stack web development scalable backend systems and production deployment workflows. Skilled in designing business logic building modern web applications and managing CI/CD pipelines and DevOps infrastructure.

PROJECT

E-Commerce Shopping Cart 2024

Tech Stack: Next.js

- Developed a responsive e-commerce shopping cart interface with product listing and checkout features
- Built reusable frontend components and interactive user interfaces
- Implemented responsive layouts and client-side state management using modern frontend technologies

WeGo Event Platform 2025

Tech Stack: React.js, Node.js, MongoDB, WebSocket

- Developed a full-stack web platform for event participation and social interaction
- Implemented REST APIs, business logic, and database operations for core system functionalities
- Designed responsive frontend interfaces and interactive user experiences
- Managed application deployment and integrated frontend and backend services

WORK EXPERIENCE

CCTV Monitoring System Internship - NT Khon Kaen 2025

Tech Stack: Python, OpenCV, YOLO, RTSP

- Developed a real-time CCTV monitoring system for people detection and alert notifications
- Implemented computer vision processing using YOLO and OpenCV for object detection workflows
- Integrated RTSP streaming for real-time camera monitoring and analytics
- Optimized detection performance for low-latency video processing

Intelligent Learning Platform Internship - Woxa Corporation 2026

Tech Stack: NestJS, PostgreSQL, Redis, Docker, CI/CD, APISIX, AWS

- Developed a microservices-based RESTful API backend using NestJS, PostgreSQL, Redis, Docker, and AWS for a gamified online learning platform
- Integrated Ai LLaMA 3 for automatic quiz generation and implemented WebSocket for real-time user activity tracking
- Configured Google OAuth 2.0 for secure authentication and managed cloud deployment on AWS

Face Attendance System Access Thai Intelligent Technology 2026

Tech Stack: Python, OpenCV, FastAPI, PostgreSQL, Docker, Minio

- Developed an AI-based face recognition attendance system for automated attendance tracking
- Implemented real-time face detection and recognition workflows using OpenCV and computer vision techniques
- Designed backend APIs and database operations for attendance management and user records
- Built responsive web interfaces and integrated real-time camera processing functionalities
