SUMMARY

Computer and Information Science student at KKU with hands-on experience from 2 internships - an AI-powered learning platform at Woxa Corporation and a real-time computer vision system at NT Khon Kaen. Skilled in backend development with NestJS, PostgreSQL, Docker, and AWS, as well as frontend development with Next.js and React.

WORK EXPERIENCE

- Intelligent Online Learning Platform with Gamification**
 - Developed RESTful API backend using NestJS, PostgreSQL, Redis, Docker, and AWS for a gamified online learning platform
 - Integrated LLaMA AI for automatic quiz generation and implemented WebSocket for real-time user activity tracking
 - Configured Google OAuth 2.0 for secure authentication and managed cloud deployment on AWS
- Internship - Woxa Corporation 2025**
- People Detection System**
 - Engineered a real-time people detection system processing live CCTV feeds via RTSP streaming with sub-100ms inference latency
 - Optimized YOLOv5 model performance and designed a responsive monitoring dashboard for live CCTV operations
- Internship - NT Khon Kaen 2025**

PROJECTS

- Shopping Cart System**
 - Developed a responsive e-commerce cart with real-time state updates and optimized rendering using Next.js
 - Ensured seamless UX across mobile and desktop devices
- 2024**
- Student Activity Registration System**
 - Designed and built a web-based platform using PHP, MySQL, and Bootstrap for managing student event registrations.
 - Added admin dashboard for event management and participant tracking, improving registration efficiency by 40%.
- 2024**
- E-commerce Platform & Admin Dashboard**
 - Created PHP/MySQL-based platform for IT product sales with secure payment, inventory management, and order tracking.
 - Developed admin dashboard for streamlined business operations.
- 2023**
- Restaurant Seat Reservation System**
 - Designed C# system to improve seating management, reduce overbooking, and enhance customer experience.
 - Integrated access control for both customers and administrators.
- 2023**

EDUCATION

- Bachelor of Computer and Information Science**
Faculty of Interdisciplinary Studies, Khon Kaen University
- Expected May 2026**
- GPAX: 3.26
 - Relevant Coursework: Software Development, Artificial Intelligence, Web & Mobile Application Development.

ADDITIONAL INFORMATION

- Technical Skills:** JavaScript, NextJS, NestJS, React, TypeScript, Python, PHP, C#, HTML, Tailwind CSS, PostgreSQL, MongoDB, Firebase, Google Cloud Services, AWS, Docker
- Languages:** Thai (Native), English (Intermediate)
