

# NUNTHAWAT SAEHUAM

**Address:** 40/6 Th. Ying Yong, Amphoe Ban Phai, Khon Kaen, 40110, Thailand  
**Phone:** 062-520-6392  
**Email:** morgorn.wk@gmail.com  
**GitHub:** <https://github.com/nuntawatt>

## SUMMARY

Backend Software Engineer with hands-on experience in building scalable microservices and real-time systems. Experienced in NestJS, PostgreSQL, Redis, and AWS, with strong background in computer vision and real-time data processing. Proven ability through internships and production-like projects.

## PROJECTS

- Restaurant Seat Reservation System**2023
- Designed and implemented a reservation system using C# to optimize seating allocation and reduce overbooking
  - Implemented role-based access control for customers and administrators
- Student Activity Registration System**2024
- Developed a web-based event registration platform using PHP, MySQL, and Bootstrap
  - Designed an admin dashboard for event management and participant tracking, improving registration efficiency by 40%
- Shopping Cart System**2024
- Built a responsive e-commerce cart system using Next.js with real-time state synchronization and optimized rendering
  - Improved user experience across mobile and desktop through efficient state management and UI optimization

## WORK EXPERIENCE

- People Detection System**Internship - NT Khon Kaen 2025
- Built a real-time people detection system using Python, YOLOv5, OpenCV, and RTSP streaming, achieving sub-100ms inference latency
  - Optimized model performance and pipeline processing for low-latency CCTV analytics
  - Designed and developed a responsive dashboard for real-time monitoring of detection results
- Intelligent Online Learning Platform with Gamification**Internship - Woxa Corporation 2026
- Developed a microservices-based RESTful API backend using NestJS, PostgreSQL, Redis, Docker, and AWS for a gamified online learning platform
  - Integrated Ai LLaMA 3 for automatic quiz generation and implemented WebSocket for real-time user activity tracking
  - Configured Google OAuth 2.0 for secure authentication and managed cloud deployment on AWS

## EDUCATION

- Bachelor of Computer and Information Science**Expected May 2026
- Faculty of Interdisciplinary Studies, Khon Kaen University
- GPAX: 3.26
  - Relevant Coursework: Software Development, Artificial Intelligence, Web & Mobile Application Development.

## ADDITIONAL INFORMATION

- Technical Skills: JavaScript, TypeScript, Python, PHP, React.js, Next.js, NestJS, REST APIs, WebSocket, PostgreSQL, MongoDB, Redis, AWS, Docker
- Languages: Thai (Native), English (Intermediate)
